Request for Modular Approval for

FCC ID: **QYL-5127MODMINI**

Item	Requirements	Requirement Met	EUT
1.	The radio elements must have the radio frequency circuitry shielded. Physical components and tuning capacitor(s) may be located external to the shield, but must be on the module assembly	Yes	The module contains a metal shield which covers all RF components and circuitry. The shield is located on the top of the board next to antenna connector.
2.	The module must have buffered modulation/data inputs to ensure that the device will comply with Part 15 requirements with any type of input signal	Yes	Data to the modulation circuit is buffered.
3.	The module must contain power supply regulation on the module	Yes	The module contains its own power supply regulation.
4.	The module must contain a permanently attached antenna, or contain a unique antenna connector, and be marketed and operated only with specific antenna(s), per §§ 15.203, 15.204(b), 15.204(c), 15.212(a), 2.929(b)	Yes	The module connects to its antenna using an UFL connector which is considered a non-standard connector.
5.	The module must demonstrate compliance in a stand-alone configuration	Yes	The module was tested in stand-alone mode as described in this filing
6.	The module must be labeled with its permanently affixed FCC ID label, or use an electronic display	Yes	There is a label on the module as shown in the labeling exhibit filed with this application.
7.	The module must comply with all specific rules applicable to the transmitter, including all the conditions provided in the integration instructions by the grantee	Yes	The module approved transmitter complies with all applicable rules and the integration manual contains any specific requirements addressed to the integrator and/or to the end-user of the final end-product.
8.	The module must comply with RF exposure requirements	Yes	The modular transmitter complies with RF exposure requirement.
