Mark Ryan
Senior Engineer
TUV Rheinland
762 Park Avenue
Youngsville, NC 27596

Dear Mark:

The remotes (PWR-08-01, PWR-08-02, PWR-08-03) are three different configurations of the same radio, each intended to communicate with the Access Point over a Bluetooth link. Specifically, they are:

- PWR-08-01: Class 1 Bluetooth radio with optional level shifter and onboard antenna
- PWR-08-02: Class 1 Bluetooth radio with optional level shifter and external antenna (onboard iPeX connector)
- PWR-08-03: Class 1 Bluetooth radio with an onboard antenna and special circuitry for connection to a glucose meter. (Note: This is the unit submitted for testing)

The radio sections of all three PWR-08-0x modules are identical; the PWR-08-03 incorporates additional CMOS switches to disconnect the serial line from the host when the board is powered down, as the host pulls up both RXD and TXD.

Sincerely,

A handwritten signature in blue ink, appearing to read "Pierre Landau".

Pierre Landau, Ph.D.
President
