

Model: DA305

OPERATIONAL CIRCUIT DESCRIPTION

U1 is a micro controller, when activated K1, K2 (magnetic reed switch) through Q1 to generates a digital signal to Q2 (R.F. osc.) and modulated to a high frequency signal last for 2 seconds. U2 is a 3V regulator for U1 power supply.

POWER SUPPLY AND GROUND

One 9V battery is the only power supply for the transmitter. No external power is needed.
