RE: Request for labeling exhibit

To Whom It May Concern:

in accordance with FCC rules and based on the fact that all variants of the TR-8xGx modular transmitter are smaller than 8x10 cm, we do not mark the FCC ID directly on the modular transmitter, we only include the FCC ID label in the datasheet of the modular transmitter.

In addition, in the Integration Guide (AN020), we remind the manufacturer to label the device with the correct FCC ID label.

Please contact me if there is any information you may need.

Sincerely,

Martin Špiller
