

RE: Certification of 'Tracker Can'

30 April 2004

E X P E R I E N T I A L B R A N D I N G

TO WHOM IT MAY CONCERN,

Please be advised that after receiving FCC approval and whilst the product is available to the public (during the promotional period – May 17 to October 12), the following FCC statement / warning will be posted with promotional rules at the relevant webpage.

MOMENTUM WORLDWIDE PTY LTD
140 WILLIAM STREET
WOOLLOOMOOLOO SYDNEY
NSW 2011 AUSTRALIA

T 61 2 8333 0000
F 61 2 8333 0001

www.momentum.au.com

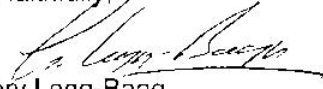

AUS 67 100 066 260

Before a phone model is made available to the public, it must be tested and certified to the FCC that it does not exceed the limit established by the government-adopted requirement for safe exposure.¹ The tests are performed in positions and locations (i.e., at the ear and/or worn on the body) as required by the FCC for each model.² The highest SAR value for this model phone when tested for use at the ear is 0.362 W/kg.³

1. In the United States, the SAR limit for mobile phones used by the public is 1.6 watts/kg (W/kg) averaged over one gram of tissue. The standard incorporates a substantial margin of safety to give additional protection for the public and to account for any variations in measurements.
2. Refer to "Evaluating compliance with FCC Guidelines for Human Exposure to Radio frequency Electromagnetic Fields – Supplement C (Edition 01-01) to OET Bulletin 65 (Edition 97-01).
3. SAR information provided to the FCC for review includes testing protocol, assessment procedure & measurement uncertainty range for this product.
(More information on the phone's SAR can be found at the following FCC website: <http://www.fcc.gov/oet/fccid>)

Caution: Use only the supplied antenna. Unauthorized antennas or modifications could impair call quality, damage the phone or result in violation of FCC regulations.

Yours faithfully,

Gregory Legg-Bagg
