The diagram illustrates the Bluetooth pairing process between two devices, A and B. At the top, device A is shown on the left and device B on the right. Device B is represented by three icons, indicating it might be a multi-user device or a group. In the center, there is a large Bluetooth symbol with a registered trademark symbol (®).

Below the device icons, two panels show the physical interaction with a circular control element, likely a dial or a touch-sensitive area, on a device. The left panel shows two fingers pressing down on the dial, with a blue arrow pointing down and a clock icon indicating a 2-second press duration. The right panel shows a single finger pressing down on the dial, also with a blue arrow pointing down and a clock icon indicating a 2-second press duration. Both panels include a speech bubble icon at the bottom right, suggesting a voice prompt or confirmation.
