Attn: Mr. Bruno Clavier

Reference: EVA Attestation Letter for *CyntrX* Product

Mr. Clavier,

The referenced product is designed in compliance with the technical specifications for compatibility of mobile and base stations in the Cellular Radio telephone service contained in "Mobile Station-Land Station Compatibility Specification" as specified in ANSI/TIA/EIA-553-A-1999"

The CyntrX product integrates Assisted GPS capability and meets the emergency location requirements of the FCC's E911 Phase II mandate. Per FCC Part 22.921, when an emergency 911 call is originated by the user, the mobile will attempt to acquire any available system and originate the emergency call on that system, disregarding restrictions set by the roaming list.

The FCC NPRM WT99-13, CC94-102 automatic analog A/B roaming option has been implemented for 911 emergency calls.

Please note that the EVA CyntrX product has Global Positioning System (GPS) support.

Regards,

Greg Taisto
President
