2. Getting started

2.1 Removing the back cover
2.2 Insert the UIM card

The mobile phone can only be used with the UIM card inserted. Insert the UIM card with the gold plate facing down, sliding it into the card slot, paying attention to the position of the slanted angle.
2.3 Install/ Remove the battery

Insert the top of the battery first, matching the gold contacts on the inside of the battery to those on the phone. Press lightly on the bottom end of the battery down into the phone until it slips into place. Place the back cover on the phone and slide it into place.

Remove the back cover and lift the battery up and away from the phone.

Note: Please switch off the phone before Installing/removing

5
the battery.

2.4 Charging your battery

Insert the battery charger plug into the mini-USB port on the right side of the phone, and plug the other end into an electrical outlet.
Note: the phone will sound alert 20 minutes before the power runs out completely.

3. Basic functions

3.1 Turn on/off

14. FAQ

If an anomaly occurs when you are using your mobile phone, please refer to the following table. If the problem remains unsolved, please contact the phone vendor.

FAQ	Item to be checked
The telephone does not charge properly	Make sure that the charger is correctly connected to the phone and the power socket. Make sure you are using a charger specifically designed for this phone.
The phone does not switch on	Check the battery charge level. Make sure the battery is properly installed. Press and hold the ON key until the screen comes on.
The phone card has been inserted but the card information cannot be read	Make sure the UIM card is properly inserted. Make sure your UIM card is valid. Make sure the card's contact face is not dirty, if it is, wipe it with a clean cloth.
The phone displays "Enter PUK number"	Contact the network operator for a PUK number. Unlock the phone using the PUK number.

FAQ	Item to be checked
Unable to dial a number	Make sure you have dialled a valid phone number. Check if your phone is connected to the network.
Poor sound quality	Check if the reception signal is strong enough. If you are inside a building, rotate the phone or move close to a window.
The other party cannot hear you during a call	Make sure the mouthpiece is not blocked.
The receiver volume is low	Check if the receiver volume is set to maximum.
The phone signal is poor or switches off frequently	Make sure the phone antenna is not damaged. Check the phone signal strength. If there is no signal, use your phone in a location where the signal is strong.
The phone displays "out of network" or "network failure".	Check if you are in an area where the signal is weak (in a tunnel or surrounded by building). Move to another location and try again. Make sure you are not trying to use a service that you haven't subscribed to. If you require this service, contact the network for details.
When you cannot connect to the network normally	(1) The network provider does not provide this service or you have not subscribed to this service. Please contact your provider for details on the subscription and use of these services. (2) Incorrect setting. Please set the correct parameters

14.   Safety and use

Please read carefully and observe the following regulations to avoid damaging your telephone or using it against the law. Electronic devices/Health care facilities.

18

SAR INFORMATION

The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue.

Device types R5CE206C(FCC ID: R5CE206C) has also been tested against this SAR limit.

The highest SAR value reported under this standard during product certification for use at the ear is 1.27 W/kg and when properly worn on the body is 1.28 W/kg. This device was tested for typical body-worn operations with the back of the handset kept 1.5cm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 1.5cm separation distance between the user's body and the back of the handset. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.

Turn off your phone when you are near high-precision electronic devices in use to avoid causing malfunction or interfering with their operation (fire alarms, automatic doors and automatic control equipment).

Turn off your phone in hospitals or places where the use of mobile phones is restricted. Mobile phones affect the normal operation of electronic devices and medical instruments, such as pacemakers, hearing aids and other electronic medical devices.

Pacemaker manufacturers recommend that mobile phones are kept at least 15 cm away from pacemakers to prevent the phone interference. When using the phone, you should hold it against the ear on the opposite side to the device, to reduce interference.

Mobile phones should be forbidden inside an operating theatre, Intensive Care Unit (ICU) or Cardiac Care Unit (CCU). Pay attention to the settings of the sound volume and the vibration to avoid disturbing the patients.

Flammable or explosive areas

Turn off your phone near flammable or explosive areas. Do not install/remove or charge the battery or use the phone in these areas to prevent any explosion or fire. Flammable and explosive areas include: chemical plants, facilities with chemical substances or particles in the air (grains, dust and

19

metal powder), petrol stations and fuel depots, fuel storage areas (for example, under a ship's deck), areas with explosion warning signs, areas with "turn off two-way radio equipment" signs and places where you are usually recommended to switch off car engines.

Safety of use in a vehicle
Please observe the relevant local or national regulations related to the use of mobile phones in a vehicle. Please refrain from using the phone while driving. If you are driving and need to use the phone in an emergency, use a hands-free device (optional purchase) to be safe. Otherwise, park the car before using the phone.
Do not place your phone on the dashboard or within an airbag deployment area to avoid causing injury to passengers in the car when the bag inflates or bursts.

Using the phone on an airplane is strictly forbidden. Turn off your phone before you board an aircraft. It is recommended to remove the battery to avoid the phone being turned on accidentally.

Storing environment
To avoid demagnetizing problem, keep the phone away from magnetic materials, such as magnetic discs and credit cards.
Ensure that the phone does not come into contact with liquids. If it does, turn it off immediately, remove the battery and quickly contact the vendor.
Do not store the phone, battery or charger in an environment with a strong magnetic field, such as an electromagnetic pot or a microwave oven, to avoid causing the phone to malfunction, catch fire or explode.
Do not subject the phone, battery or charger to heavy impact or vibration to avoid battery leakage, phone malfunction, overheating, fire or explosion
Do not place sharp metallic items such as needles, near the receiver because the receiver will attract them and you may be injured when using the phone.
Do not place the phone in the back pocket of your trousers or skirt to avoid damaging it when you sit down

Child health
Keep the phone, battery and charger out of the reach of children. Do not let children use the phone, battery or charger

without supervision.

Do not let a child put a battery in his/her mouth to avoid electrolyte poisoning.

Keep children away from small phone accessories to prevent suffocation or blocking of the oesophagus as a result of swallowing.

Operating environment

This phone is equipped with a built-in antenna. When the phone is on, unless necessary, do not touch the antenna area (top of the phone) for optimal communication quality.

Do not use your phone while it is being charged during thunderstorms, or use it outdoors to avoid being struck by lightning or other injury.

Do not use your mobile phone in dusty, wet, dirty places or places near magnetic fields to prevent malfunction of its internal circuits. Keep the phone as dry as possible. Keep the phone, battery and charger away from water and water vapour and do not clean the phone with a wet cloth to avoid short circuits, malfunction due to corrosion and electric shocks.

Do not turn in or off the phone against your ear to avoid your ears and body from being impaired.

To comply with regulations on radio frequency exposure, keep the antenna at least one inch (2.5 cm) away from your body when holding your phone or using its data functions.

If you feel unwell (epileptic seizures or blackouts) after playing the games with your phone for a long period of time, please seek medical assistance immediately.

Move your mobile phone away from your ear while using the hands-free mode, because the amplified volume might cause hearing damage.

Make sure you switched off your phone in areas where mobile phone use is prohibited!

Cleaning and maintenance

Switch off the phone before cleaning and maintenance. The charger should be unplugged from the power socket and the phone and charger disconnected to prevent any electric shock or short circuiting of the battery or charger.

Do not wipe the phone or charger using chemical substance (alcohol benzene), chemical agents or abrasive cleaning agents to avoid damaging its parts or causing a malfunction. You may clean with a slightly damp anti-static soft cloth.

Do not scrape or alter the phone case as paint substances may cause an allergic reaction. If such a reaction occurs, cease using the phone immediately and seek medical help.

Wipe dust off the power plug and keep it dry to avoid risk of fire

If the phone or accessories do not work properly, contact your local vendor

Do not dismantle the phone or its accessories yourself.

Protecting the environment

Please observe the local regulations on phone packaging, battery and used phone disposal and bring them to the collection point for proper recycling. Do not dispose of used phones or batteries in a household rubbish bin.

Please take your used, unwanted lithium batteries to a designated place. Do not dispose of them in a rubbish bin.

Emergency call

In an emergency situation, if the phone is on and you are within the network range, it can be used to make an emergency call. However, emergency call numbers may not be reachable on all networks; you should never rely on your mobile phone for emergency calls.

Using the battery/charger

Only use batteries and chargers approved by the manufacturer. Do not use batteries or chargers that are not compatible with your model to avoid any explosion.

Do not throw a battery in a fire as it might catch fire or explode.

Do not cause a short circuit to the charger as it might result in malfunction, smoke or fire.

Do not place conductors like metals, keys or jewels, against the battery poles or allow them to touch the ends of the battery to avoid short circuiting the battery and causing injury (burns, for example) as a result of battery overheating

If the power cable is damaged (wires exposed or broken) or the connection to the plug is loose, do not use it to avoid electric shock, short-circuit of the charger or a fire.

Do not dismantle the battery or weld the two poles of the battery to prevent the battery from leaking, overheating, catching fire or exploding.

Keep the charger away from any container of water or other liquids. Infiltration of liquid may cause electric leakage or other

malfunction to the charger.

If the battery leaks, emits smoke or a strange odour, cease use immediately and move it far away from naked flames or people to avoid a fire or injury from explosion.

Do not charge the battery in a dusty or damp environment and keep the cable away from heated objects.

The battery is not fully charged when leaving the factory. Therefore, you should charge the battery for two hours before use. Before charging, make sure the charge plug is correctly inserted in the power socket. If it is incorrectly inserted, electric shock might occur and the phone or battery may catch fire or explode. When charging is completed, pull out the charger plug from the power socket, and do not pull the cable.

If the liquid in the battery splashes into your eyes, do not rub the eyes to avoid damaging your vision, rinse the eyes immediately in clean water and go to a hospital for assistance.

Do not place heavy objects on the charger cable. Do not damage, twist or pull the cable to avoid causing electric shock or fire.

When the battery cannot be installed correctly in the phone, do not press down on it heavily to prevent it from leaking or exploding. Do not remove the battery when the phone is on.

If the battery is distorted, has changed colour or is unusually hot when charging or when it is stored, remove immediately the battery and stop using it or it may leak, become overheated, explode or catch fire.

If a battery is not used for a long period of time after charging, store it at room temperature

Do not touch the power socket, power cable or charger with wet hands to avoid electric shock.

If water or other liquid enters the charger, immediately disconnect the charger plug from the power socket to prevent it from overheating, catching a fire or malfunction.

Explanation:

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and

used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

— Reorient or relocate the receiving antenna.

— Increase the separation between the equipment and receiver.

— Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

— Consult the dealer or an experienced radio/ TV technician for help.

The instructions in this user manual apply to Traditional Chinese language mode. In other language operating modes, slight differences may appear.

Warning: The manufacturer disclaims any liability for damage, which may result as a consequence of improper use of this mobile phone or use contrary to the instructions contained in this manual.
