iBitz™ Wireless Fitness Keys Instructional Manual

iBitz™ by GeoPalz® is a wireless family activity monitor. The new iBitz PowerKey and Unity activity monitors, a physical activity based device and game that wirelessly syncs to your iOS Bluetooth 4.0® (BLE) phone and allows adults and children their own unique experience with personalized apps. The iBitz Unity for adults tracks steps, distance, weight, height, overall physical activity, even BMI, and allows them to incorporate their family members, and even form groups with friends. While the kid's iBitz PowerKey, interface incorporates characters called GeoBotz, that a child must keep healthy with physical activity, healthy food, and plenty of water. The iBitz PowerKey is a successful way to engage children in being physically active because of the ability to bring the joy of gaming to physical activity!

Instructions:

1. Download the iBitz app iTunes® App store. Click here for the Adult Unity App. Click here for the Kid PowerKey App. The app requires an iPhone® 4S or greater, iPad® 3rd Generation or greater, iPod® Touch 5th Generation or greater.
2. On the iBitz device, press and hold the "wake up" button on the right side of the device for 10 seconds till the light on the top goes from green to red.
3. Launch your app on your device and follow the onscreen registration process.
4. Once registration is complete you are ready to start monitoring your activity, place the unit on your hip or shoe, and you are ready to go!

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
