

TWV-101 Circuit Principle

1. MP3 or DVD Audio signal ,from IC BH1417N PIN 1 and PIN 22, 2 channel input ,and PIN 19 stereo pilot signal , stereo signal output from IC BH1417N PIN5
2. Stereo signal from IC BH1417N PIN 10 modulation through C15 to Q1 amplification from antenna transmit.
3. Base band frequency assist 7.6and c14,c17
4. PIN 15,16,17,18 Channel select
5. 24CL02 Channel select
6. HT49R30A-2 is LCD Display driver
