TIMCO Engineering Inc.
849 NW State Road 45
Newberry, Florida 32669

Gentlemen:

The attached documentation is provided in support of a formal submission to your organization for a mobile approval of an intentional unlicensed transmitter. On behalf of our client, Aegis Labs has included an application for a Grant of Equipment Authorization pursuant to Subpart C of part 15 of FCC Rules (47 CFR) regarding intentional radiators. The data within the test report demonstrates the equipment was tested in a manner described under Part 2 and 15 of the Code of Federal Regulations.

This is a submittal for Portable approval of the Wireless Embedded Device Server MN: WB2100LFS-02 (FCC ID: R68WIBATTV2). The Wireless Embedded Device Server provides a network-enabling solution based on the IEEE 802.11b/g wireless standard.

It was tested as a standalone device with a Wanshih 2.15dBi Antenna (PN: WSS002) continuously transmitting and receiving from the antenna port.

If there are any additional questions or if further information is needed, please contact us at your earliest convenience.

Sincerely,

Johnny Candelas
