January 17, 2014

Subject: The Sapling Company, Inc.
FCC ID: R73HPB-24G-1
Date of Grant: 8/26/2013

Good Afternoon,

The purpose of this Class II Permissive Change filing is to amend the limitations of host installations listed on the original grant of equipment authorization for FCC ID: R73HPB-24G-1.

It is requested that the host model limitations be changed from:

“Approval is limited to installation into Grantees hosts only part # SMA-1SR-G000-1 and SMA-3SO-G008-1.”

To:

“Approval is limited to installation into Grantees hosts only SMA Series Master Clocks and NTP Series Master Clocks.”

The host model limitation listed on the original Grant were too restrictive as the part numbers listed detail system options which have no bearing on the RF section or the devices compliance with Part 15. All SMA and NTP Series Master Clocks are identical with respect to limited modular approval requirements to the model in which certification testing was performed.

Best Regards,

Retlif Testing Laboratories
