## Charging Your Device

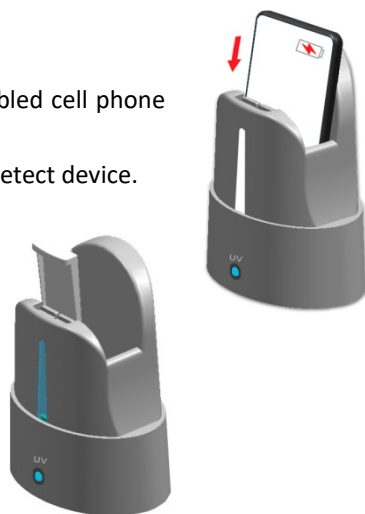

1. Remove Anti-UV mask and place your Qi enabled cell phone in disinfection room.
2. The white LED indicator is solid if UV-W1586 detect device.

## Finding Your Charging Spot

In case of UV-W1586 not detect your cell phone, put a height adjuster in guild slot. There are 2 height adjusters, one for 5.8" and one for 4.7".

## Trouble Shooting

**Ensure that no metal objects or metallic material interferes with wireless charger. If your case or back cover accessory contains metal material, please remove before charging.**

## Sterilizer Your Device

**It is highly recommended to put anti-UV mask back to the base of UV-W1586 before sterilizing your cell phone.**

Touch UV switch to activate disinfection and blue LED is On. The sterilizer will be automatically off after 15 minutes.

## Care and Maintenance

- Keep Device Dry. Do NOT expose the device to liquids. If device gets wet, immediately unplug it and allow it to dry.
- Do not disassembly or attempt repair.
- Use device under temperature only between 0 ~ 45°C

## IMPORTANCE

(How to output 5W/ 7.5W/ 10 W?)
