

## Operational Information

Concerning FCC ID: R8VDASDEC-1EN

The DASDEC is fully compliant with FCC Part 11.

The DASDEC is a PC platform based on the VIA EPIA mainboard. It uses PCI soundcards and onboard audio for input of EAS audio signal sources and to output EAS encoded audio.

It provides a Web based user interface to fully configure and operate the device.

It has a backlit LCD display and 2 LEDs on the front panel for indicating decoding/encoding status.

It provides a serial port and network interface for operational control.
