

Receiver::

1. System power supply:9.6-Volt
2. Antenna and receiving diagram receive the controlling signal which matched the receivable frequency.
3. IC RX-2 drive the decode and control related component:JZ1,JZ2,JZ3,JZ4.

Transmitter part:

1. System power supply:9.0-volt
2. Press the TURBO,FRONT,BACK,LEFT,RIGHT key to control Forward, Backward, Left or Right function of Hovercraft.
- 3.IC TX-2 send out encode signal, enlarged by circuitry and carrier wave, transmitted by antenna and transmit circuitry.
