

User manual:

Use introduction: Fit on the batteries according to the polarity (9V zinc battery is for controller, 9.6V rechargeable battery pack is for the hovercraft). Open the on-off on the hovercraft, the air cushion would be lifted, at this moment the hovercraft is in working. Then pull up the radio antenna and push the control stick, then you can operate the hovercraft. Please note that the longest control distance on land is about 30 meters, on water is about 45 meters.
