

INSTRUCTION MANUAL FOR R/C MINI TANK FH002

Get ready:

1. Tank out blister from the controller and obtain the antenna.
2. Secure the antenna with its end thread into the antenna hole on the controller.
3. Remove the battery covers on the controller. Insert 3" AAA" batteries (not included) into the controller, and insert 3 " AAA" batteries (not include) into the charger. Then replace the battery cover.

Charging the tank:

Place the tank onto the charging holder on the charger tightly. The Recharging Lamp will turn on when charging the tank. The lamp will turn off when the tank is fully charged.

Remark:

- a). If the power of the batteries inside the controller are low or out, the lamp light will become dim or off. And it cannot charge up the tank. Replacement of new batteries is required.
- b). Ensure the orientation of tank onto the charging holder should match the same direction engraved on them.

Operating instruction:

1. Fully extend the antenna of the controller.
2. LEFT BUTTON powers left side Prop (propeller). When pushed up(forward) it turns vehicle to RIGHT.
LEFT BUTTON:
Left Motor Forward / Release for Left Motor Neutral / Left Motor Reverse
3. RIGHT BUTTON powers right side prop. When pushed up (forward) it turns vehicle to LEFT.
RIGHT BUTTON
Right Motor Forward / Release for Right Motor Neutral / Right Motor Reverse
4. BOTH BUTTON when pushed up together make the vehicle go straight ahead.

Remark:

- a). When operating the controller, hold ht controller so antenna points straight up in the air, and do not touch the antenna during operation.
- b). If the speed of the tank become slowly, that means the charge-in power is almost used up. Recharge the tank according to the aforesaid procedure.

FCC STATEMENT:

"Modifications not authorized by the manufacturer may void users authority to operate this device".

NOTE:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instruction, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
