RE: FCC Class II Permissive Change for RCX-EE11ABG3

Communication Machinery Corporation has been shipping an EmulationEngine product for testing wireless LANs with fixed, 1.5dbi antennae. To meet market demands, we need connectorized antennae with gain of 4.5 to 5.0dbi. This modification will allow cabled testing in noisy RF environments.

Please conduct tests as necessary and file an application with the FCC for a Class II Permissive Change, retaining the current FCC ID: RCX-EE11ABG3.

Questions regarding this request may be directed to me at (805) 879-1515, or email at green@cmc.com

Sincerely,

Larry Green, President
