

Strong As An Ox™

May 8, 2003

I have designed the following label to be attached to all BrakeLite devices. Transmitters and Receivers are paired units so they will receive identical serial numbers. The Following Label is constructed of 0.003"- 0.005" polyester label paper with a durable latex adhesive backing. It is 1.75" x 1.25" and will be located on the back of the BrakeLite enclosures.

Sample FCC Label:
