

6. Safety Human exposure

6.1 Radio Frequency Exposure Compliance

6.1.1 Electromagnetic Fields

RESULT:**Pass**

Test standard : FCC KDB Publication 447498

Since maximum peak output power of the transmitter is 0.000334 mW (60.47 dBuV/m at 3m), which far below 1 mW, hence SAR test exclusion applies according to FCC KDB publication "4474989 D01 General RF Exposure Guidance v05".
