***Hereby declare***

Both AP832E and AP822E are identical and there are no changes to the hardware and enclosure. The only difference is that the AP832E uses 6 external antennas and the AP822E uses 4 external antennas for normal operation. Meru Software will enable 4 radio chains and disable 2 radio chains in the AP822E model. AP822E total Transmit EIRP is 1.77dB less than AP832E and the two disabled radio chains in the AP822E will not transmit any signals.
