Change Contents: XP8i is a dual radio WLAN access point. Both XP8i and AP822IV2 are identical and there are no changes to the hardware and the enclosure. The only difference is that the management software. AP822IV2 is controlled and managed by a Meru Controller which is part of the enterprise network where as the XP8i is controlled and managed from the cloud networks thus eliminates the controller.

Sincerely,

Rajendran V. Chary
Meru Networks Inc.
