Subject: Declaration of Model Similarity in the AP26XX Family

Applicant:	Chantry Networks Inc. (a Siemens Company)
Product:	Siemens HiPath Wireless Access Point
Models:	AP2601, AP2610, AP2620, AP2630, AP2640
FCC ID:	REB-APXXX1

Dear Sir/Madam:

We, Chantry Networks Inc. (a Siemens Company) declare that Siemens HiPath Wireless Access Points AP2601, AP2610, AP2620, AP2630, AP2640 fundamentally have the same hardware except for the difference in antennas. AP2601, AP2610 and AP2630 are with internal antennas and are identical in design and construction. Similarly, AP2620 and AP2640 are with external antennas and are identical in design and construction. The differences are in the software functionality on the digital side, the model number and the labeling. The differences in the functionality are in the mode of operation, AP2610 and AP2620 with, and AP2601, AP2630 and AP2640 without intervention of a controller. There is no difference in the radio part of the software.

Yours Truly,

A handwritten signature in black ink, appearing to read "Dobre", written over a horizontal line.

Mihai Dobre
