

Product Operation Description of SP2592

This product is a pair of 900MHz receiver, which is wireless speaker system for audio usage. They would be operated with its associated transmitter and with AC/DC adaptors or 6 pieces of “AA” size batteries. The main function of SP2592 is receiving of RF signal from associated transmitter, demodulate the received signal and then express in audio sound via the loudspeaker. The frequency range of SP2592 is 912.0MHz and 913.0MHz; the receiving frequency can be adjusted by pressing the AUTO TUNE button, which was equipped at the front side of SP2592’s body. So the receiving frequency of receiver will be locked to the transmitted frequency of its associated transmitter after the AUTO TUNE button has been pressed.

SP2592 have two volume control buttons for adjusting the output volume and a power On/Off button. A Bass Boost button is provided for the Bass Boost function switch. There are a blue audio signal indicator LED and a blue power indicator LED.
