Digital multi player **pOTaZ™**

PM-101T/102T/105T(E)
User's Manual

Version 1.0

Thank you for choosing this product.
Please read carefully this manual before you start to use.

Caution

For optimum performance and safety, please read carefully the following instructions.

*. Safety Notes

1. Do not use the product at the following places.
 - Direct expose to high temperature(over 60°C)
 - Isolation in closed space such as inside of a car
 - Humidity
 - Direct expose to sunlight or heat
 - Dusty place
2. Do not apply heavy shock to the unit.
3. Do not use while driving or walking to avoid accident.
4. Do not use the device in places where aviation or electronic equipment is restricted.

*. Warnings on Battery

1. Do not disassemble or attempt to dispose of batteries in fire.
2. Any surface contact to electrolyte should be cleansed out with water, and if electrolyte enters the eyes, rinse out with clean water and seek medical treatment immediately.

*. Discard batteries promptly, if problematic symptoms like smoke or deformation from heat occur.

*. Check the remaining capacity of batteries before recording, for the recording stops if the batteries become exhausted.

*. Beware that we cannot warrant any damage or third party liabilities out of using the unit.

*. Make sure that any memory or data loss due to other reasons than the breakdown or repair of the device are not on warranty list.

Product features

(1) Supporting Multi-Codec

- Supports playback for MP3 and WMA files.

(2) E-Mailing

- You can check your e-mail and internet explorer favorites almost anywhere even on your trip with Plug-In mail program in the POTAZ, just by connecting the device to the PC. You can upgrade the speed of your business.

(3) Removable storage device

- Provides USB mass storage function usable as a removable hard disk, which enables to save data whenever or wherever with Windows Explorer without extra driver.

(4) FM radio & recording

- Provides auto scan and channel memory to let you listen to FM radio easily. You can record sound anytime while listening to FM radio. And you can experience recording sound of the best quality just as original sound.

(5) Best quality sound

- Brings you the full, eloquent sounds of the best quality as original sound. You can enjoy exquisite sound effects with 3D surround sound. (Sound effect functions may be different with each model.)

(6) Plug & Play

- You do not need any additional program. You can use right away just by connecting to the PC.

(However, You have to install an extra program on Windows 98)

(7) Language study function(A-B Repeat)

- the POTAZ is the best product for language study with its A-B repeat function.

(8) Various EQ Modes

- You can enjoy versatile sound effects with Normal, Rock, Pop, Classic, Live and user mode.

(9) Direct encoding

- Provides direct encoding function, which enables you to convert tracks from your Walkman or CDP to MP3 file in real-time.

(10) Voice recording

- Provides voice record function, which enables you to record meeting or lecture for maximum eight and a half hours. You don't have to worry about missing important data.

(11) Stylish design and accessories

- The innovative design of the POTAZ with versatile colors and its aluminum cover case create a classy look.

(12) Easy control(Jog Button)

- You can control functions easily with jog button.

(13) Supporting multi-language

- the POTAZ services diverse languages including Korean, English, Chinese, Japanese.

(14) Folder navigation

- Supports maximum 256 folders and 1000 files. You may categorize tracks by singer, period, genre and so on.

(15) Firmware upgrade

- You can regularly update the latest functions for this device.

(16) Ultra-lightness

- You can enjoy fist-sized the POTAZ while moving or exercising and you even can put it around your neck because it weighs only 32 g.

(17) Playback over 10 hours with an AAA battery

- Enables to playback continuously over 10 hours.

4-5. Deleting all files

Press the Play button shortly
to delete all files in memory.

- If YES or NO is prompted, press the Menu button for YES and move the FF/REW to rightward/leftward for NO.

7. UMS functions

(1) Installing/Removing driver

the POTAZ provides UMS (USB Mass Storage) function, which enables you to use the device as removable disk just by connecting to PC.

You can use the device in Microsoft Windows ME or higher without additional driver.
Microsoft Windows 98 users can utilize the device as removable disk after installing driver as follows.

1. Remove the POTAZ from the PC.

2. Run the "setup.bat" file in the "Driver\Win98DiskDriver" folder of user's CD.

3. Restart the PC if the following message appears after the installation completes.

**All Installation Is Completed !
We Recommend To REBOOT Your Computer**

4. Connect the POTAZ to the PC after restarting.

5. If the following message appears during installation, restart the PC and then install again.

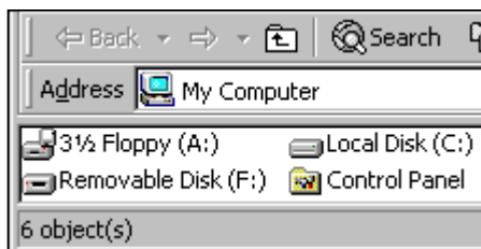

**YOU NEED REBOOT YOUR COMPUTER
and RUN THIS PROGRAM AGAIN !**

6. To remove driver, do as follows.

- Disconnect the POTAZ from the PC.
- Run "uninstall.bat" file in "Driver\Win98DiskDriver" folder of user's CD.
- Restart the PC.

(2) Using UMS

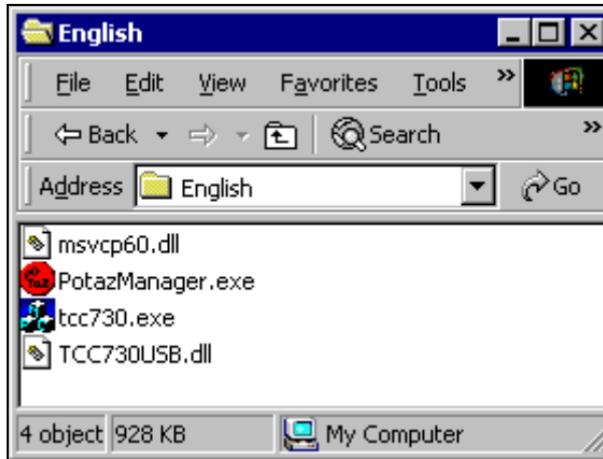

1. If the POTAZ is installed as removable disk, System Device Manager menu appears as follows.
(Device names may be different in each O/S)

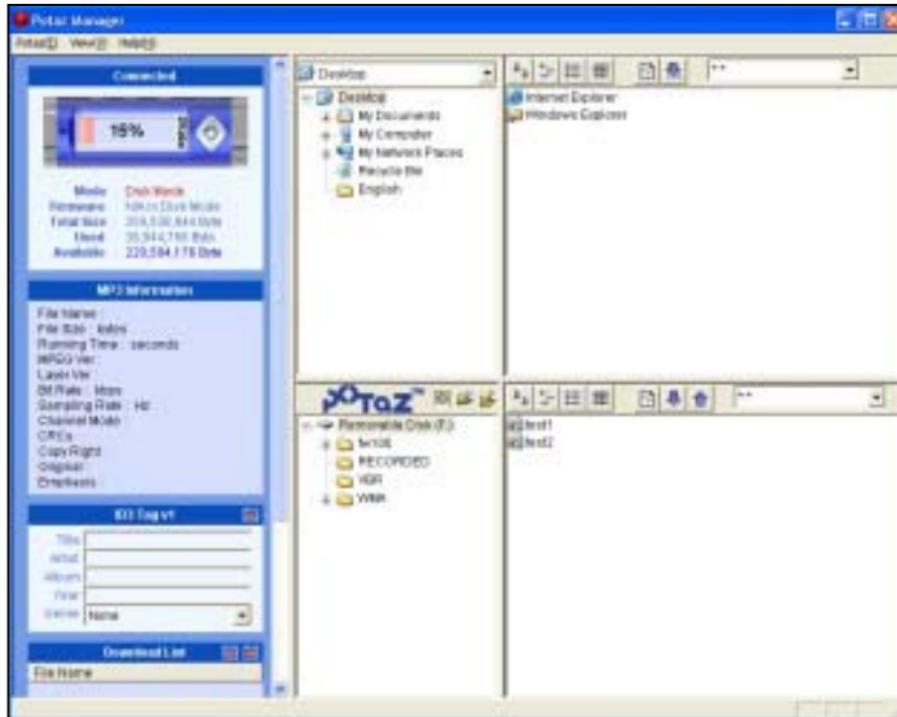

2. To check the POTAZ installed as removable disk, run "My Computer" or "Windows Explorer".
(Drive letters may be displayed differently in each O/S)
3. If the installation is completed, the device can be used with the same method as other hard disks.

(1) Running the program

1. Run "PotazManager.exe" file in "PotazManager\English" folder of user's CD.

2. To run the program on hard disk, copy "PotazManager\English" folder of user's CD to the relevant hard disk first.
(To run the program, all files as in the illustration are needed.)

(2) Display

Display of the POTAZ Manager consists of the followings.

- Left Window : displays the POTAZ status, MP3 file information and edits ID3 Tag / Download list.
- Upper Right Window : displays folder and file structure of the computer being connection to the POTAZ.
- Lower Right Window : displays folder and file structure of the POTAZ.
If the POTAZ is being connected in the Upgrade mode, folder/file structure is not displayed.

(3) Button keys and menus

1. Select display method for each Icon.
(Big Icons, Small Icons, List, Details from left)

2. Refresh the current window.

3. Add selected files to the download list.

4. Download files from the PC or upload the POTAZ files to the PC.

5. Display files on the current window by filtering.

6. Update ID3 Tag information of selected files.

7. Delete selected files from the download list

8. Download files from the download list to the POTAZ.

9. Create a new folder or remove an empty one in the selected path.

10. Edit the play list of the POTAZ.

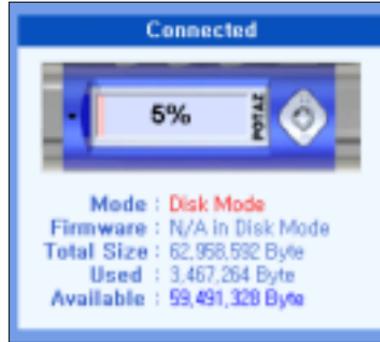

11. "POTAZ" Menus

- Visit POTAZ Homepage : Check the latest information on the POTAZ products.
- Upgrade Firmware : upgrade the POTAZ firmware.
(Beware that the menu can function only in the Upgrade mode)
- Download Firmware : download a firmware file to upgrade from the POTAZ Homepage.

12. View menu : display or hide status bar at the lower side of the program.

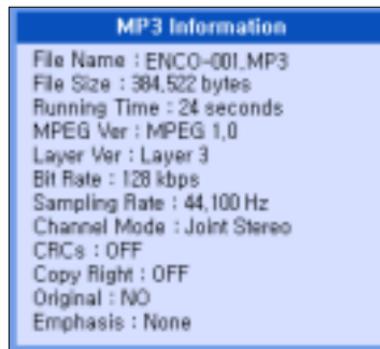

13. Help menu : indicate the information about the program.

(4) Disk mode

If the POTAZ is being connected in the Disk mode, "DISK Connect" message appears on LCD display. Manager program can perform functions similar to Windows Explorer.

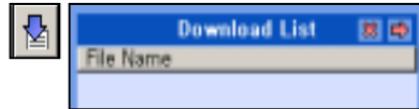

1. Upper left box indicates current status of the POTAZ.
Firmware version may be displayed only in the Upgrade mode.

2. Left center box displays detailed information on selected MP3 file.

3. Lower left box displays ID3 Tag information on selected file.
User can edit the information on his/her own.
Click the check button to save the changes.

4. Select file(s) to transfer and press the arrow button to transfer files between PC and the POTAZ.

5. To send files of many folders at a time, add them to the download list first.

6. Right-click "DELETE" with mouse or press the "Del" key to delete a file.

7. Other functions concerning files and folders can be operated in the ways similar to Windows Explorer.

8. To change the playback order, Click the button "Edit Playlist".

9. You can add or delete the POTAZ file(Right side) to(from) Playlist(Left side).
Also you can change the order "Up", "Down" button.
With "Sort" button, you can sort the Playlist in name order.

10. After editing of the play list, don't forget to save with 'save' button.

(5) Upgrade mode

1. Installing upgrade driver

You can enjoy improved performance of the device with Firmware Upgrade.
 Firmware upgrade can perform only if the device is being connected in the Upgrade mode.
 To connect the device in the Upgrade mode, Upgrade driver must be installed first.
 (Common in all O/S)

1) Remove the POTAZ from the PC.

2) Run "setup98MeXp.bat" file in "DriverUpgradeDriver" folder of user's CD.
 (Windows 2000 users run "setup2000.bat" file.)

3) Connect the POTAZ to the PC in the Upgrade mode.

(For detailed information, refer to the section of "Using menu keys")

4) If you set the POTAZ to the Upgrade mode, System Device Manager menu appears as in the illustration below.(Device names may be different in each O/S)

2. Firmware download

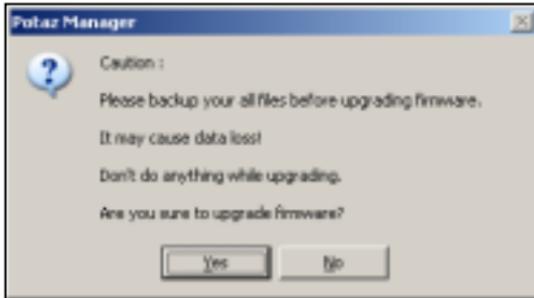

If the POTAZ is being connected in the Upgrade Mode, "Upgrade mode" message appears on the LCD of the device. And Manager program is run to help firmware upgrade.

- 1) Check your firmware version.
- 2) Go to the "Download Firmware" menu of the "POTAZ" menu and save a firmware file to the PC.
 If you are connected to the POTAZ Homepage, go "Support" or "Download".
 (Version 1.0 is connected directly to the POTAZ Homepage. And automatic check function will be supported later)

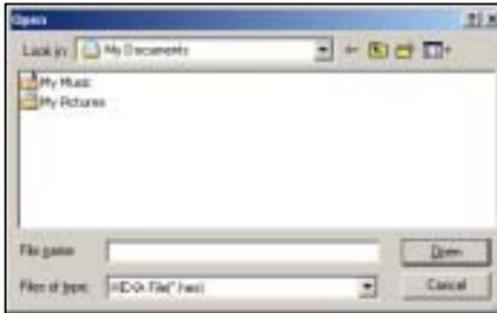

3. Firmware Upgrade

1) If firmware file download is completed, run the "Upgrade Firmware" menu.

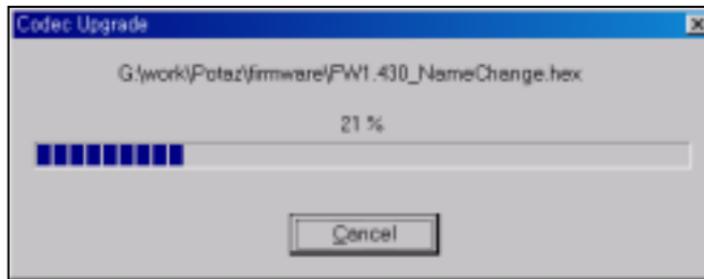

2) If there are important data in the POTAZ, press "NO" to back up the data in different device.

3) Press "YES" to select a downloaded file.

4) Do not perform other tasks while upgrade proceeds.

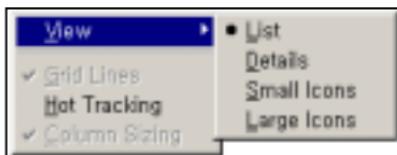

5) If Upgrade is completed, remove the POTAZ from the PC and reconnect it again. The program is finished automatically.

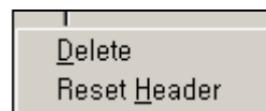

9. E-MAILING program

(6) Other functions

Right-click the mouse on Explore window (from upper right or lower right) to set other functions.

1. View: select a display method for each Icon.
2. Grid Lines: "Details" view function to display lines.
3. Hot Tracking: selects a file automatically. One click can run the file.
4. Column Sizing: column size may be adjusted in "Details" view function.

5. Click column header in "Details" view to delete or reset header.

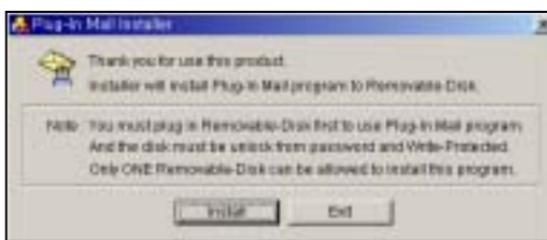

6. When you select the file to copy, the status bar shows the number of files & capacity.

10 Files Selected (51,218,593 Bytes) : Exceed to Copy

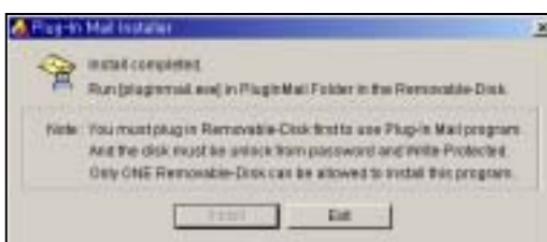

(1) Installing/Removing Plug-In Mail

1. Run 'Setup.exe' in 'PlugInMail\English' folder inside the CD.

2. When the left dialogue box "Plug-In Mail Installer" appears, then click "Install".

3. When "Install completed" message appears, click "Exit". Then, run the "pluginmail.exe" in the "PlugInMail" folder in Removable-Disk, and start to use the program.

4. The Plug-In Mail program works only in the 'PlugInMail' folder of Removable-Disk.
5. Please delete the 'PlugInMail' folder in Removable-Disk to remove the Plug-In Mail program.
6. When you delete 'PlugInMail' folder, all of your saved data and mails will be deleted.

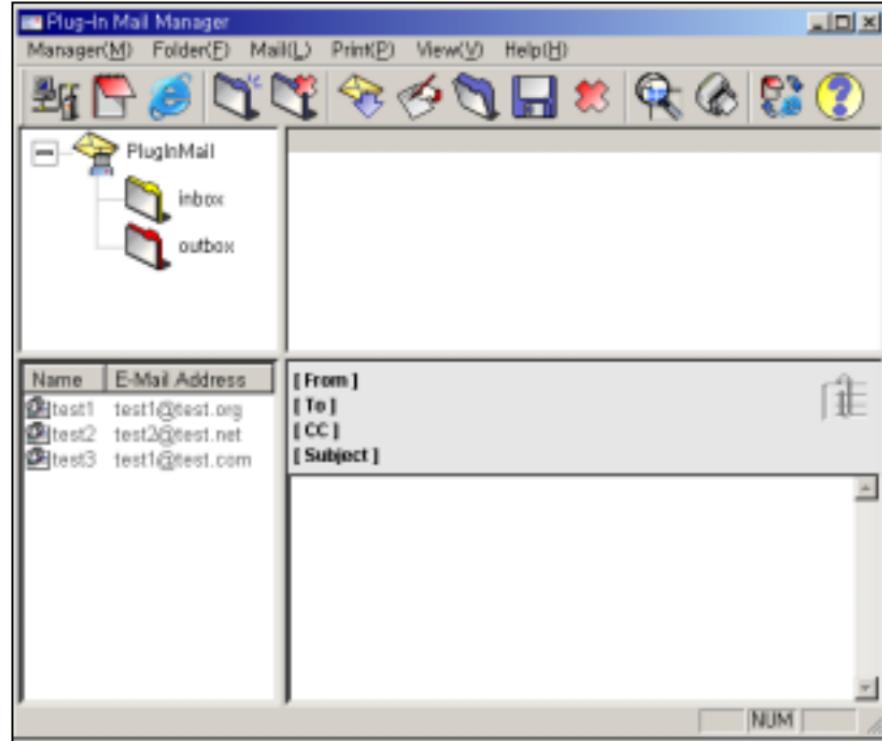

(2) Getting started Plug-In Mail

Run 'plufinmail.exe' in the 'PlugInMail' folder in Removable-Disk.
Then the program will be started.

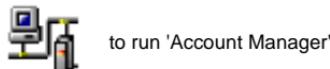

1. Each window shows like below.

Radio Frequency Interference Requirements

Caution: Changes or Modifications not expressly approved by the party responsible for compliance could void the users authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note.
