

Response to TCB Findings

1. There are 2 frequencies listed on Form 731 and the report, but the test results only address 433.93MHz. Please clarify.

Response: [See attached TCB Replies for 3W06960](#)

2. Please provide a more detailed plot to determine the 10 seconds minimum silent period between transmissions. The plot shows roughly 10 seconds and the user manual states exactly 10 seconds on the last paragraph of page 2.

Response: [See attached TCB Replies for 3W06960](#)

3. On page 13 of the manual alternative power source is mentioned. Has the testing been conducted with a 12VDC battery or power supply? If the device has the capability to connect to a DC power supply, compliance to 15.207 and 15.31(e) should be demonstrated. Please clarify.

Response: [See attached TCB Replies for 3W06960](#)

4. Please specify the label material.

Response: [The label material is mylar](#)

5. The user's manual should include 15.105(b) statements as the device can connect to a PC. Please supply a revised manual.

Response: [See revised manual](#)
