

Rexnet Receiver R3 Setup Instructions

RGZ-R3

The user manual & operation instructions for the Heyrex system are delivered online at www.heyrex.com as part of the process required to activate and use the device.

The instructions for correct installation are reproduced below. These instructions are displayed before the user is instructed to power the device on.

Once installed the Rexnet requires no user interaction and has no controls.

Setting up your Rexnet

1. Screw the white aerial into place on the side of the Rexnet.
2. Connect the white network cable into a spare socket on your router/broadband modem.
3. Insert the other end of the cable into the Rexnet network socket.
4. Plug the Rexnet power adapter into a wall outlet.
5. Put the other end of the power cable into the end of the Rexnet unit.
6. Watch the blue and green lights on the side of the Rexnet, next to the aerial. During start up, the blue light will flash repeatedly, then the green light. Once the green light turns on (and stays on), your setup is complete.

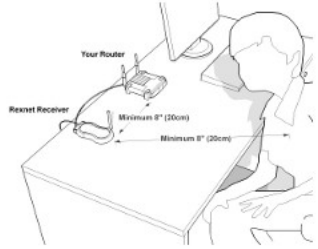

Checking for a Rexnet at your address

You already have a Rexnet device (MAC address **DC:30:9C:00:00:61**) registered to this account.

Please Note:
Any changes or modifications could void your authority to operate the equipment under the laws of your country.

- You must set up and use the Rexnet correctly (i.e. lying flat with aerial pointing upwards.)
- You must use the power adaptor supplied (it is acceptable to use a replacement Category 5, 5e or 6 network cable.)
- You must use the antenna provided and attach it correctly.
- The Rexnet must be set up at least 20cm (8") away from people and other electronic devices including your wireless router.
- Do not attach any accessory, antenna or other device to the Rexnet that has not been provided by Heyrex.
