Cover Letter-Modular Approval

FCC ID: RI7LE310Q1SN

Gentlemen:

There's a <u>Radio Module</u> that would like to have your authorization as a modular approval. The specific product as below, <u>Radio Module</u> with its designed features and specified description, meets special requirements for <u>a single-modular approval</u> on FCC KDB996369 by cross-reference list below.

Company	Telit Communications S.p.A.
Model Name	Radio Module
Model Number	LE310Q1-SN
FCC ID	RI7LE310Q1SN

Requirement of FCC KDB996369	Comply (Y/N)
1. The modular transmitter must have its own RF shielding.	Y The EUT provides the RF shielding. See EUT photo.
2. The modular transmitter must have buffered modulation/data inputs (if such inputs are provided) to ensure that the module will comply with Part 15 requirements under conditions of excessive data rates or overmodulation.	Y The EUT has its buffered modulation. Please see the Schematic Diagram.
3. The modular transmitter must have its own power supply regulation.	Y The EUT has its own power supply regulation, please see the Schematic Diagram.
4. The modular transmitter must comply with the antenna and transmission system requirements of Sections 15.203, 15.204(b) and 15.204(c). The antenna must either be permanently attached or employ a "unique" antenna coupler (at all connections between the module and the antenna, including the cable). The "professional installation" provision of Section 15.203 is not applicable to modules but can apply to limited modular approvals under paragraph (b) of this section.	The EUT meets the FCC antenna requirements; unique antenna connector and photo of antenna are shown in the test report.
5. The modular transmitter must be tested in a stand-alone configuration, i.e., the module must not be inside another device during testing.	Y The EUT was tested with a test board, Please see test report and setup photo

Date: September 15th, 2025

6. The modular transmitter must be labeled with its own FCC ID number, and, if the FCC ID is not visible when the module is installed inside another device, then the outside of the device into which the module is installed must also display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains Transmitter Module FCC ID: RI7LE310Q1SN or "Contains FCC ID: RI7LE310Q1SN. Any similar wording that expresses the same meaning may be used. The Grantee may either provide such a label, an example of which must be included in the application for equipment authorization, or, must provide adequate instructions along with	Please see exhibition label sample for the FCC ID of this module. And also in the exhibition Users manual, there are instructions give to the OEM on how to label the end product.
the module which explain this requirement. In	
the latter case, a copy of these instructions	
must be included in the application for	
equipment authorization.	
7. The modular transmitter must comply	Υ
with any specific rule or operating	The EUT is compliant with all applicable FCC
requirements applicable to the transmitter	rules. Details instructions for maintaining
and the manufacturer must provide adequate i	compliance are give in the User Manual.
nstructions along with the module to	
explain any such requirements. A copy of these	
instructions must be included in the application for equipment authorization.	
8. The modular transmitter must comply	Υ
with any applicable RF exposure	The EUT complies with RF exposure
requirements. For example, FCC Rules in	requirement.
Sections 2.1091, 2.1093 and specific	- oqui omeni
Sections of Part 15, including 15.319(i),	
15.407(f), 15.253(f) and 15.255(g), require	
that Unlicensed PCS, UNII and millimeter wave	
devices perform routine environmental evaluati	
on for RF Exposure to demonstrate compliance.	
In addition, spread spectrum	
transmitters operating under Section 15.247 a	
re required to address RF Exposure	

Thank you.

15.247(b)(4).

compliance in accordance with Section
