6731 Whittier Ave, McLean, VA 22101

October 21, 2003

RE: NEC System Integration & Construction

FCC ID: RJGHX68C

I have a few comments on this Application.

- 1.) Please supply a Test Report conforming to the Certification procedure of Part 2.
- 2.) Form 731 only shows voice modulation F3E. This is an incomplete emission designator. We must have it in the form which includes the necessary bandwidth [i.e: 16K0F3E]. In addition, the Manual per page 4 indicates this device can also transmit data. Please provide an appropriate emission designator for data transmission.
- 3.) A Tune Up procedure is required for all Licensed transmitter submissions.
- 4.) The label and location exhibit indicates the label will be attached to the face of the EUT with adhesive. Please note the label must be permanently attached. Kindly indicate the method for insuring this label will be permanent.
- 5.) There are several documents which are identified as Confidential at the AmericanTCB.com website that are not identified in the Confidentiality Request letter. Please resolve this discrepancy.
- 6.) Please provide an RF Exposure estimation exhibit.
- 7.) Please note that additional information may be requested upon receipt of the Test Report.

William H. Graff
President and Examining Engineer

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
