

FM Transmitter/Charger

For iPod® with Dock Connector

Instructions

To transmit and charge the iPod in the car:

1. Plug the FM Transmitter/Charger into the car's DC power source (12v outlet or cigarette lighter). A red LED light will show at the end to indicate that it is being powered.
2. Connect the other end of the FM Transmitter/Charger cable to the dock connector port on the bottom of the iPod.
3. Select a FM station on your car stereo from one of the eight channels below:

88.1	88.5	107.1	107.5
88.3	88.7	107.3	107.7

*Choose a channel that has no signal or is currently not transmitting a radio station.

4. Position the two channel selection buttons on the side of the charger unit to match the FM channel on your car stereo.
5. Turn on the iPod and play your favorite tunes through the radio. If the iPod music isn't being heard, repeat steps 3 and 4 until you hit a clear station match. A green LED light will light up when the iPod is transmitting music.
6. The FM Transmitter will automatically turn off after 60 seconds of not receiving music from the iPod.

FCC Information

This device complies with part 15 of the FCC rules and regulations.

Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Caution: Changes or modifications not expressly approved by Kensington may void the users authority to operate this equipment.
