Declaration

We, Parrot automotive, hereby declare and confirm that the hardware evolutions of the FC7100 module from HW08 to HW09 are listed below:

- Power management
 - External DCDC_1V5 used (P7MU_DCDC not used anymore)
 - Low power mode (a MOSFET is used to turn off 1V5_P7)
 - HW reset function (a reset supervisor added)
 - Power management unit evolution (Parrot P7MU to Parrot P7MUr2d)
- Parrot processor evolution P7r3 to P7r4E (ROM change)
- EEPROM removed
- DDR routing improvement (layout)
- I²C isolation function added
- Change in BT power table: lower level (SW configuration, independent of HW)

Paris, 16th July 2015
