RT for project: AN03T3399 Blue'cord USB Rx RL8POCKETTV20BJ

Subject:

Question #1: Please remove the big shielding box on the PCB board, which has the antenna terminal on it, and retake the EUT internal photo.

Question #2: P3, EUT is operating under 15B PC peripheral and 15.117 TV broadcast receivers, not 15.101.

For your info: Per ANSI C63.4, all the peripherals used in the compliance test shall keep 10cm away from each other. If 1.5 x 1m table is not big enough to accommodate all peripherals, you can extend test table to have larger size.

Best Regards
