## 2. U.S. FCC CLASS B NOTICE

This equipment has been tested and found to comply with the limits for a Class B Digital Device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy, if it is not installed or used by the instructions, it may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, that could be determined by tuning the equipment on and off, the user is encouraged to try to connect the interference with the following option:

- Re-orient or relocate the reception of antenna.
  - Increase the separation between the equipment and the receiver
  - Connect the equipment into an outlet on a circuit different from that which the receiver is connected to.
  - Consult the dealer or an experienced Radio / Television technician for help.

### 3. PRODUCT OVERVIEW

This 17" SXGA TFT LCD Monitor, accepts standard analog RGB signal. This monitor supports SXGA and lower resolutions at the frame frequency up to 75Hz. Lower resolution modes can be expanded to full screen through the expansion algorithm. The user interface includes Audio, Display, Control, Auto Adjust, and additional features.

This monitor contains high-end LCD controller, which have high performance and user friendly interfaces. Fancy design monitor makes your desk simple and luxury.

The LCD monitor neither emits harmful rays nor requires space. Moreover, it conforms to VESA DPMS (Display Power Management Signaling) requirement, therefore energy consumption is remarkably little. Actual power consumption of LCD monitor is less than 35 watts during the operation, in contrast CRT monitor. These features guarantee you with safe, clean, and healthy environment.

### 4. PLUG & PLAY

This monitor supports VESA DDC 1/2B requirements, therefore it is truly Plug-and-Play for all PCs. No hardware or software change needed. It finds optimum setting value automatically without any diskette installation by DDC process.

- DDC Process

Abbreviation of 'Display Data Channel'.

The format of data exchange between Monitor & VGA Card.

### Warning

Please do not open the monitor, because it may cause electric shock to the customer. Also, the warranty program may not support the damages, which user causes. When problem persists in spite of trying the following troubleshooting advice, please contact dealer or the repair center listed.

### Trouble and countermeasure

#### LED doesn't lit / No image

Check if the display is in power saving mode.

Check if the display is switched on or the power cable is properly connected.

#### Image is unstable (Flicker, Interference, Noise, etc.)

Check if signal cable is secured

Check if frame (vertical) frequency of video signal is lower than 75Hz because this monitor can not run over 75Hz. In this case, please change the setting of 'Display Control Panel' of Windows to 60Hz, that displays the best performance.

#### Dull image

Adjust the Frequency or Phase.

Adjust the frame (vertical) frequency to 60Hz.

Remove any video signal distributor.

#### Dark or saturated image

Adjust the Brightness or Contrast.
