

User's Guide of KL-3088 Wireless Keyboard

Note: For proper operation of the above devices, please take time to read the User's Guide carefully before using.

1. Notice:

This product has been tested and meets the limitations on Class B digital device in Article 15 in FCC Clause. The purpose of these limitations is to provide reasonable protection and fight against harmful interference in the course of installing and using radio frequency energy. Harmful interference on wireless communication may be produced if users do not install and use the equipment according to the instructions in this manual.

2. Preparation

1. Check to make sure the following components are available:

- 1 unit of the wireless keyboard
- 1 unit of mini nano receiver
- 2 pieces of AAA alkaline batteries

3. Turn on your host computer.

4. Take out the originally used keyboard.

5. Install batteries for the keyboard (See the following figure).

- Step 1: Open the cover of the battery compartment;
- Step 2: Install the required battery into the compartment;
- Step 3: Close the cover of the battery compartment

6. Plug the mini nano receiver into the USB port of the host computer

3. Note:

1. The units use the three-class of intelligent power-saving mode. The units switch to the

power-saving mode automatically when you do not press the keyboard. The lifetime of batteries for the keyboard is from 3 to 6 months based on the usage frequency of the batteries.

2. When the voltage of the keyboard batteries is inadequate, the low-pressure indicator will be turn on, Please replace the batteries.

Light will be flashing at this point

Warning:

You must stop using the keyboard to relax your hand after the continuous 30-minute operation of the keyboard. Long-time continuous operation of the keyboard may cause temporary or eternal injuries to your wrist.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This device and its antenna(s) must not be co-located or operating in conjunction with any other antenna or transmitter.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
