Maintenance and care

Please read following suggestion carefully that will help you to fulfill any warranty obligations and to enjoy this product many years.

1. Keep this kit dry. Humidity and all types of liquids or moisture will corrode electronic circuits
2. Don't store the headset in hot areas. High temperatures can shorten the life of electronic devices, damage batteries and warp or melt certain plastics.
3. Don't attempt to open the headset. Non-expert handling may damage it.
4. Don't drop, knock or shake the headset. Rough handling can break internal circuit boards.
5. Don't use harsh chemicals, cleaning solvents, or strong detergents to clean the headset.
6. Don't scratch the cover of headset.

If the headset can't working properly, please carry it to the nearest qualified dealer. The personnel there will assist and help you warmly.

FCC ID: RLQBH5300

Made in China

This device complies with Part 15 of the FCC Rules.

Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
 2. This device must accept any interference received,
- Including interference that may cause undesired operation

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

FCC RF Radiation Exposure Statement:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. End users must follow the specific operating instructions for satisfying RF exposure compliance. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

This product has been tested and complies with the specifications for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used according to the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which is found by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna
- Increase the separation between the equipment or devices
- Connect the equipment to an outlet other than the receiver's
- Consult a dealer or an experienced radio/TV technician for assistance
