Gentleman

This is a letter to list modifications that were added to the transmitter of "SET 'N TOW" model KETOW1 so that it would meet compliance testing.

Three resistors, in a "T" pad configuration, were added in the transmission path to the antenna. This attenuation circuit brought the level in compliance and will be incorporated during production. The resistor values and respective "R" numbers are shown on the enclosed schematic.

If you have any further questions or need additional information, please feel free to give me a call at 610-326-9868.

Sincerely,

Richard Kuntzleman
President
