ATTN.: Reviewing Engineer

FCC ID: RNH-TOP8812BU  
Host Model Name : EXPD 4343N1

- Tune Up Related Matters:

| Band   | Mode          | Nominal Power<br>(dB m) | Maximum Power<br>(dB m) | Tune-up<br>tolerance |
|--------|---------------|-------------------------|-------------------------|----------------------|
| DTS    | 802.11b       | 17                      | 19                      | $\pm 2$              |
|        | 802.11g       | 14                      | 16                      | $\pm 2$              |
|        | 802.11n(20M)  | 13                      | 15                      | $\pm 2$              |
|        | 802.11n(40M)  | 12                      | 14                      | $\pm 2$              |
| UNII-1 | 802.11a       | 14                      | 16                      | $\pm 2$              |
|        | 802.11n(20M)  | 14                      | 16                      | $\pm 2$              |
|        | 802.11ac(20M) | 14                      | 16                      | $\pm 2$              |
|        | 802.11n(40M)  | 10                      | 12                      | $\pm 2$              |
|        | 802.11ac(40M) | 10                      | 12                      | $\pm 2$              |
|        | 802.11ac(80M) | 9                       | 11                      | $\pm 2$              |
| UNII-3 | 802.11a       | 11                      | 13                      | $\pm 2$              |
|        | 802.11n(20M)  | 11                      | 13                      | $\pm 2$              |
|        | 802.11ac(20M) | 11                      | 13                      | $\pm 2$              |
|        | 802.11n(40M)  | 8                       | 10                      | $\pm 2$              |
|        | 802.11ac(40M) | 8                       | 10                      | $\pm 2$              |
|        | 802.11ac(80M) | 6                       | 8                       | $\pm 2$              |

The difference between the transmitter output power at nominal PWR levels, measured at the same channel is not be more than about 2 dB. And it doesn't exceed the Maximum power.
