

## Operational Description

### Driver Installation & un-installation on Windows 98

If your operation system is Windows 98, you will see a pop up “detected new device” wizard as soon as you plug Gripio into PC. The message tells you that PC had detected the USB flash drive but Windows doesn't know what it is. Please follow install steps below:

1. Plug USB flash Drive into PC, Windows will display Add new device wizard.
2. Click [Next] button.
3. Choose [search for new device driver] option than click [next] button.
4. Put the CD come with Gripio into CD-ROM drive.
5. Choose [search CD-ROM Disk] option than click [next] button.
6. Windows will find out and install Gripio driver automatically.
7. If installation succeed, click [Next] button than click [Finish] button, the installation is completed.
8. If error messages occur, click [cancel] many times to leave wizard. Maybe you put wrong CD in PC, eject CD-ROM and check it. Or repeat step 1 to 7 again.
