To whom it may concern

RE: FCC ID ROJEXPLORER-710

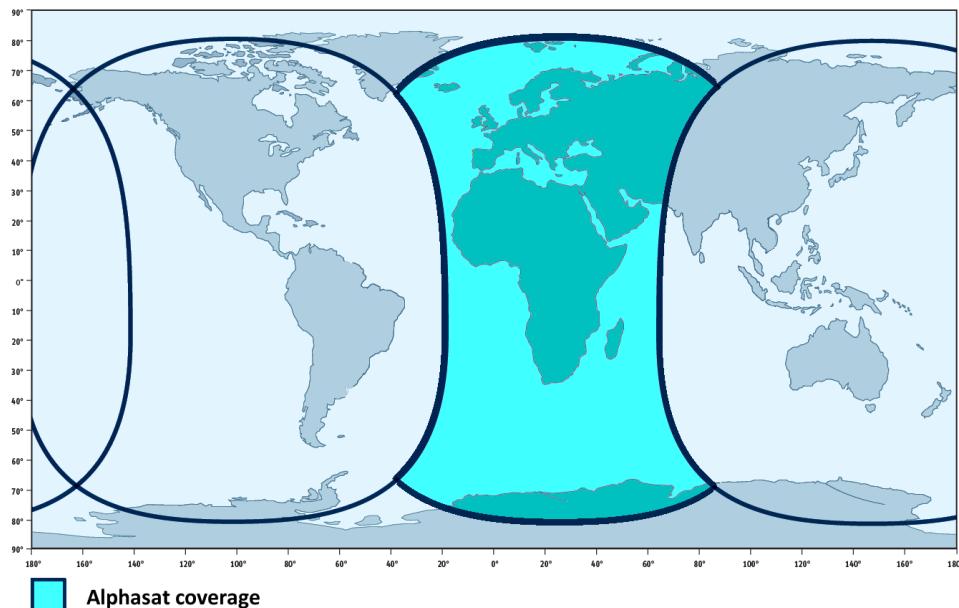

Model TT-3720B

The EXPLORER-710 TT-3720B will in most part of the world operate in the following bands:
TX 1626.5-1660 MHz
RX 1525-1559Mhz.

However in the area that is covered by Alphasat, will the frequency band be expanded to the following:

TX: 1626.5-1660.5MHz +1668-1675MHz
RX: 1525-1559Mhz +1518-1525MHz

The area that is covered by Alphasat can be seen on the picture below where it is marked with a blue area, covering Europe and Africa.

Sincerely,

A handwritten signature in black ink that reads "Morten Becker Saul".
