

Shenzhen KTC Technology Co., Ltd.

No SAR Justification for FCC ID: ROU00004

The EUT is a portable device with 802.11b/g/n wireless function, As per KDB 778498 Appendix A, SAR Test Exclusion Thresholds for 100 MHz - 6 GHz and ≤ 50 mm is 10mW.

Maximum measured transmitter power in 802.11b mode:

<i>Frequency (MHz)</i>	<i>Conducted Power(dBm)</i>	<i>Conducted Power(mW)</i>	<i>SAR Test Exclusion Threshold (mW)</i>
2412	8.89	7.745	10

Conclusion:

Since the power is less than the threshold, SAR test is not necessary.

Sincerely,

Leon
