14 RB

15 Charging Indicator

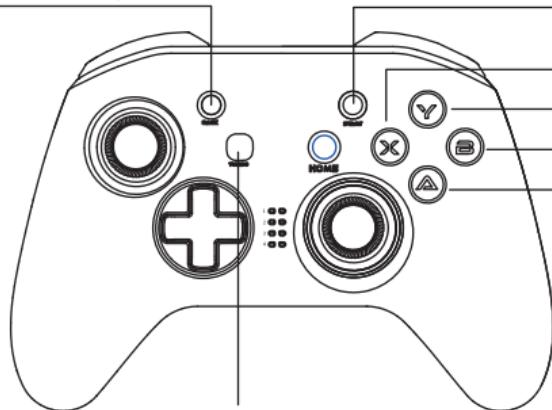

Charging - red light ON

Charging Complete - red light OFF

16 Type-C Port (charging & data transmission)

SWITCH Mode Key Layout

Corresponds - key

Corresponds + key

Corresponds X key

Corresponds Y key

Corresponds B key

Corresponds A key

Correspondence: Capture button

1. The default screenshot key on the switch host.
2. Press the R3 button and capture button at the same time. Then it will switch to TURBO button function, when the switch is successful, the TURBO LED is always on. Press "R3+ Capture" Button again, you can switch the button to capture function button.

Note:

Press the R3 key first and then hold down the capture key

CHARGING

Low Battery Indicator:

Channel light flashes; Vibration function off.

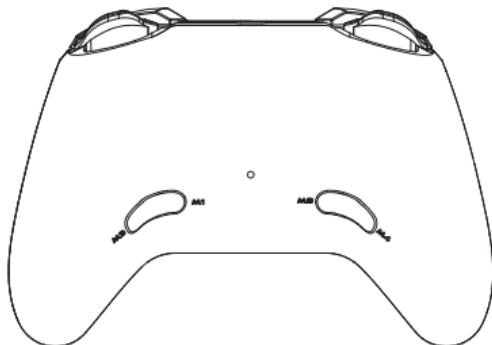

Charging Indicator:

red light

Charging Complete:

red light off

PROGRAMMABLE M BUTTONS

(**M2, M3, M4 and M1** setting method are the same)

(**M1,A ,X** are examples)

MODE A: **M1** button Equivalent to press **A** and **X** Simultaneously

MODE B: **M1** button Equivalent to press the **A** and **X** key in Sequence

(Nintendo Switch do not support Programmable functions. When connect to Nintendo Switch ,M1 default B key, M2 default A key, M3 default Y key, M4 default X key)

PC, PS3, Android mode:

Mode A :

For example, M1 key operation method, (M2, M3, M4 and M1 setting method are the same)

- 1) Hold down M1 and then hold down the BACK button. At this time, the red and blue lights of the decorative circle are always on at the same time, then enter the setting state.

- 2) Press and hold the key you want to combine. (E.g. X A)
- 3) Press M1 again to confirm the combination key, the setting is completed, the red light ring is off, at this time, The combination is set successfully. When you press M1, X and A have functions at the same time. (Because some games need to press multiple buttons at the same time to make big moves or make continuous actions)
- 4) The combination keys that can be set are: (A, B, X, Y, LB, RB, L3, LT, RT, R3, direction keys: up, down, left, right)

Mode B:

For example, **M1** operation method

- 1) Hold down **M1** and then hold down the START button. When the backlight ring turns pink, enter the setting state.
- 2) Press and hold the key you want to combine. (E.g. X, A)
- 3) Press **M1** again to confirm the combination key setting is OK, the red light of the decorative circle goes out, at this time, The combination is set successfully. When you press **M1**, after the **A** function is activated, the **X** function is then activated. Similar to the effect of a marquee.
Because in some games, the buttons must have a sequence in order to make big moves or corresponding continuous actions. So this is related to the sequence of holding down **X** and **A** when setting, Example: First press **A**, then **X**, then **M1** function is **A → X**; if First press **X**, then **A**, the **M1** function is **X → A**.
- 4) The combination keys that can be set are: **A, B, X, Y, LB, RB, L3, R1, LT, RT**, directionKey (up, down, left and right)

TURN OFF THE PROGRAMMABLE M FUNCTION

- To turn off M1: Press “**M1**”, then press “**Back**”, then press “**M1**” again
To turn off M2: Press “**M2**”, then press “**Back**”, then press “**M2**” again
To turn off M3: Press “**M3**”, then press “**Back**”, then press “**M3**” again
To turn off M4: Press “**M4**”, then press “**Back**”, then press “**M4**” again

PC XINPUT WIRELESS MODE CONNECTION SETTINGS

The second controller: LED2 is normally on.

The third controller:LED3 is normally on.

The fourth controller.LED4 is normally on.

The fifth controller:LED1+LED4 is normally on.

The sixth controller.LED2+LED4 is normally on.

The seventh controller:LED3+LED4 is normally on.

FCC Caution.

(1) § 15.19 Labelling requirements.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

§ 15.21 Changes or modification warning

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

§ 15.105 Information to the user.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of

the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
