

**RISO KAGAKU CORPORATION**  
**FCC ID: RPARFA3A**  
**Request for transmitter modular approval**

Characteristics of the Modular Transmitter

Item	Requirements	Does the EUT meet the requirement?
<b>1</b>	Have its own RF shielding	This module is not required to have its own RF shielding to meet FCC emission requirements. It was tested in a stand alone configuration without external shielding.
<b>2</b>	Have buffered modulation/data inputs (if such inputs are provided)	All inputs to the module are buffered through logic or microprocessor inputs.
<b>3</b>	Have its own power supply regulation	This module has own power supply regulation.
<b>4</b>	Meet the antenna requirements of Section 15.203	The requirements are not met; however, the module is so configured that it is impossible for the user to replace the antennas.
<b>5</b>	Be tested in a stand-alone configuration, i.e., the antenna, AC or DC power and data input/output lines must be connected to the module but, the module must not be inside another case during testing	This modular transmitter was tested in a stand-alone configuration outside the host device during testing. The host device is an ac-powered unit intended to be used as office/business printer.
<b>6</b>	Be labeled with its own FCC ID number, and if the FCC ID is not visible when the module is installed inside another device, then the outside of the device into which the module is installed must also display a label referring to the enclosed module.	This modular transmitter is labeled with its own FCC ID number, and, as the FCC ID is not visible when the module is installed into the host device, the host device bears a label wording: “Contains FCC ID:RPARFA3A”
<b>7</b>	The modular transmitter is manufactured so that the user cannot influence the operation of the transmitter that will operate outside of the scope of the regulations.	The module is so manufactured.
<b>8</b>	Address compliance with the Commission's RF exposure limits in Sections 2.1091 and 2.1093. In addition, spread spectrum transmitters operating under Section 15.247 are required to address RF exposure compliance in accordance with Section 15.247(b)(4).	The module is not subject to 2.1091, 2.1093 or 15.247. (It is not mobile, portable, or spread spectrum transmitter.)
