

RISO KAGAKU CORPORATION
FCC ID: RPARFOM5
Request for transmitter modular approval

Transmitter Module Characteristics

Item	Requirements	Does the EUT meet the requirement?
1	Have its own RF shielding	This module does not have its own RF shielding. Limited modular approval is applied.
2	Have buffered modulation/data inputs (if such inputs are provided),	All inputs to the modules are buffered through logic or microprocessor inputs.
3	Have its own power supply regulation	This module will be installed inside RISO printer only. RISO printer will provide power supply. Limited modular approval is applied.
4	Meet the antenna requirements of Section 15.203	This requirement is not met; however, the module is so configured that it is impossible for the user to replace the antenna.
5	Be tested in a stand-alone configuration, i.e., the antenna, AC or DC power and data input/output lines must be connected to the module but, the module must not be inside another case during testing	This modular transmitter was tested in a stand-alone configuration outside the host device during testing. Since two modular transmitters are installed into the host, the radiated emission test was done by two modular transmitters. The host device is an ac-powered unit intended to be used as office/business printer.
6	Be labeled with its own FCC ID number, and if the FCC ID is not visible when the module is installed inside another device, then the outside of the device into which the module is installed must also display a label referring to the enclosed module.	The proposed FCC ID label format is to be placed on the module. If FCC ID is not visible when the module is installed into the system, “Contains FCC ID: RPARFOM5” shall be placed on the outside of final host.
7	The modular transmitter is manufactured so that the user cannot influence the operation of the transmitter that will operate outside of the scope of the regulations.	The module is so manufactured.
8	Address compliance with the Commission's RF exposure limits in Sections 1.1310 and 2.1093. In addition, spread spectrum transmitters operating under Section 15.247 are required to address RF exposure compliance in accordance with Section 15.247(b)(4).	This module is not subject to 1.1310, 2.1093 or 15.247. (It is not mobile, portable, or spread spectrum transmitter.)
