

Energy Saving Lamp

Instructions

- Conserves natural resources by saving 80% less electricity than incandescent bulbs.
- About 8 times lamp life than a standard incandescent bulb.
- Electricity cost saving base on avg. life of 8,000 hours (avg. initial lumens) compared to incandescent bulbs(avg. life 750 hours).

Notice

- Never use with the following fixtures:
 - dimming circuit
 - emergency lighting fixtures
 - electronic timer fixtures
 - direct current fixtures
- Use only at the rated voltage and frequency circuit. The power voltage fluctuation must be within $\pm 10\%$ voltage rang.
- Use indoor only. Never install in a position where water may drop on the lamp or where the atmosphere is humid.
- Not recommended for use at high or low ambient temperature [above 40°C or below 0°C]
- Do not use in fixtures that would enclose lamp. If lamp enclosed, the lamp's life would be shorten.
- Always turn off the switch when replacing or cleaning the lamp. Remove and install by grasping only the plastic portion of the lamp.
- Added weight may cause instability of free-standing portable lamps in which the distance from the bottom of the base to top of the lamp hold dose not exceed 3 times minimum vase width. Use only with portable lamps which are provided with lamp shades.
- This product complies with Part 18 of the FCC Rules but may cause interference to radios, television, wireless telephones, and remote controls. If interference occurs, move product away from the device or plug either into a different outlet, or move the lamp out of the sight with the remote control receiver.
- This product could produce interference when used near 0.7V, radio, wireless remote control or maritime safety communication equipment, or other critical navigation of communication equipment operating between 0.45---30 MHZ. If interference would occur, move the lamp away from the appliance a distance of three feet or more, Or plug the lamp or the appliance into a different outlet.
