**Letter of Attestation**

**Model: RTKS3C0 (FCC ID: RTKS3C0)**

The primary purpose of Kodiak's smart cover is to enable PTT functionality over Bluetooth technology (BT) and it works with PTT application on the mobile phone. The Smart Cover and PTT application (on mobile phone) use SPP Protocol for communication. PTT application (on mobile phone) works in server mode & smart cover works in slave mode. The PTT application (SPP server) is required and be running on phone to use Smart Cover's PTT operations via BT. PTT/Cellular calls use the Smart Cover's BT MIC/Speaker.

PTT application will work only for users who registered/subscribed for operator's PTT service.

Kodiak's Smart cover is intended to be used with ATT's Samsung SIII (SGH-I747, FCCID: A3LSGHI747) only"

A handwritten signature in blue ink, appearing to read "Ravi Ayyasamy".
