FCC ID: RTTAB-WLNB

Dear Sir:

The following application is submitted on behalf of our client, DPAC Technologies, for evaluation of model ABDB-AN-DPxxx for a Class II Permissive Change in accordance with Part 2 of the FCC rules.

For the purpose of this evaluation the DPAC Technologies ABDB-AN-DPxxx 802.11b module was evaluated in a configuration with multiple simultaneously transmitting radios. This configuration consisted of the DPAC Technologies ABDB-AN-DPxxx 802.11b module integrated into the Itron Electricity Metering Inc. electricity meter model CVSOR-A. The Itron electricity meter CVSOR-A was previously certified under FCC ID: SK9AMI-2A.

The characteristics likely affected by the combination of these devices were tested and provided in this application. Due to co-location and simultaneous transmission of multiple transmitters both RF exposure and radiated inter-modulation products were evaluated. Inter-modulation products were compliant and the RF exposure exhibit is provided with this application.

Sincerely,

Kirby Munroe
Director, Wireless Certifications
