The device's type of your local Computer (i.e., Desktop , laptop or server

5. After successful installation, you'll see the new icon appears in the Icon Tray.

If the installation fail, Please refer to the User Manual in “Manual & Driver CD-ROM” for solution.

Note

This dongle has been recognized with the International Standard Organization for **BQB/FCC/CE** certifications and it is compatible with most of the Bluetooth enabled devices.

However, the following situations might occurred:

1. Due to the limitation on Operating Systems, AV and Headset Profiles cannot be supported by Win98SE/ME.
2. During the time of running Windows 98SE/ME; due to the OS limitation, the situation of “system exception” might be occurred:
 - a. If it happened during the process of “driver installation, please uninstall the software and reinstall it back.
 - b. If it happened after completing the “driver installation”, please reboot your computer.
3. In order to avoid system conflict, it is suggested to remove the previously installed Bluetooth software.

For more details or more language supports, please refer to CD contents.

3.2 How To Use Audio-Mate Headset & Bluetooth USB Dongle

3.2.1 Connect Audio-Mate Headset with Bluetooth USB Dongle

1. Turning on the audio-mate Headset Power-On Switch, the Power-On LED will start **rapid flashing** that is into standby mode for paring.

Federal Communication Commission Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. To maintain compliance with FCC RF exposure compliance requirements, please avoid direct contact to the transmitting antenna during transmitting.
