Hillsboro, OR 97214

To Whom It May Concern:

We, the undersigned, seek FCC Part 15.231(e) original certification for our Smart Controller model SC-03 designated by FCC ID -HCZ-SC-03.

The Smart Controller is a low-power transmitter designed to facilitate the control of the temperature of an individual room. The Smart Controller continuously monitors the temperature of the room and occasionally transmits this information back to a control unit that uses the information to condition the house. It uses an amplitude-shift-keying modulation technique and transmits at 418 MHz. The device is categorically excluded from RF exposure evaluation because it meets the requirements for FCC Part 15.231(e).

Sincerely,

A handwritten signature in black ink, appearing to read "Zachary R. Wheeler".
