Hi Marianne,

1. Attached is the label only.
2. The drawing showing the label location is only for the purpose of showing the label's location on the unit.

Regards

Hello David,

Just letting you know that I have forwarded this application to technical review. I just have one small item from an administrative viewpoint:

1. The label example that is by itself to the side of the page is fine, however the label on the device, meant to show location, states ____04. Could you please send an amended one with the 04 reading 05 in both places, or a short note stating you're just using it for location description. The FCC is picky about things and I just want to head off any possible confusion.

2/23/2004

In the meantime it is in the hands of the technical review engineer. Iso, I'm just wondering, are there any questions with the IC Test report cover sheets for each of the other 3 EMTS'?

Have a great weekend,

Marianne
