

## **Technical Description**

CL3, CS-CL3 & BT-CL3 are 433.92MHz pulsed RF transmitter remote control. The remote control's internal MCUs receive information from the keypad and convert the keystrokes into a pulse code(by chip PT2262). The pulse code is then sent to the SAW component which incorporate 433.92MHz RF transmitter(X1), RF band pass filter (SAW fliter), then send signal to modulation module (Q1), and transmit through the integral antenna.
